INTRODUCING MAUREEN GABRIEL

Maureen Gabriel - Director and Principal In-House Legal Counsel of one of Australia's leading firms in blockchain and digital asset investigations. A qualified lawyer with a specialisation in Law and Emerging Technologies, she is also a Chartered Certified Financial Crimes Investigator and recognised expert in cryptocurrency forensics. Maureen's investigations have uncovered and analysed complex schemes involving multi-million-dollar cryptocurrency disputes and financial crimes. She works closely with lawyers, regulators, and insolvency practitioners, providing expert evidence in high-stakes disputes.

At LightYear Training Group, Maureen brings this unmatched expertise to her role as Master Trainer, delivering education that blends practical case experience with cutting-edge legal and forensic frameworks. Her modules focus on cryptocurrency investigations, financial crime prevention, digital-asset compliance, and legal-tech strategies, equipping professionals to stay ahead in today's regulatory and technological environment.

Webinar Intro Run-Down

Today's session is really about giving you a taste of what's ahead.

Over the coming weeks, we'll be diving into a series of masterclasses that are designed to demystify crypto and blockchain for professionals across accounting, law, insolvency, and compliance. Let me quickly run you through the modules so you can see just how much value there is in being part of these sessions

About the Series

Crypto & Blockchain 101 is a groundbreaking webinar series designed for professionals who can't afford to be left behind in the digital asset space. Across these sessions, we'll strip away the hype and confusion to give accountants, lawyers, liquidators, insolvency practitioners, and compliance professionals the tools they need to deal with crypto confidently.

CRYPTO & BLOCKCHAIN 101 SERIES OF COURSES

Unpack how crypto fits into SMSFs — and where it often goes wrong. Learn how to trace, value, and report digital assets correctly so your audits and compliance align with ATO standards.

Crypto is reshaping settlements. Discover how to uncover hidden holdings, ensure full disclosure, and present crypto valuations that withstand scrutiny in negotiations and court.

Digital assets are no longer invisible in bankruptcy. Gain practical strategies to detect undisclosed crypto and tools to support recovery in insolvency proceedings.

Step inside two of today's most dangerous scams. Learn how they work, why crypto drives them, and how to safeguard your clients from devastating losses.

Go behind the headlines with real case breakdowns of scams and hacks. Walk away with clear, practical steps to protect yourself and your clients from the next breach.

Demystify crypto and blockchain in plain English. A fast-track introduction that cuts through the jargon and gives professionals the confidence to engage with clients in this space.

What happens to crypto when someone dies? Learn how to plan, disclose, and transfer digital assets in estates with confidence and compliance.

Crypto brings new compliance risks. Understand your AML/CTF obligations, spot red flags, and ensure you're protected from liability when working with crypto clients.

Uncover how criminals hide crypto on the dark web and through mixers. Learn the signs to watch for and how professionals can detect and disrupt laundering.

Any Questions?
